

GEOGRAPHICAL FEATURES

NORTH AMERICA

Directions: Use the regional and country-specific pages in *Geography of the World* to identify three to five examples of each of the geographical features listed below. You may find many more than three to five examples for some items -- if so, please list the ones you think are most significant. You will draw and label all of these features on the "Mapping North America" page.

Places Where Land & Water Meet

islands, peninsulas, straits, fjords, isthmuses, and deltas

Saltwater Features

oceans, seas, bays, gulfs

Mountains or Ranges
